SUMMARY

Data Engineer building production ELT platforms, warehouse models, and orchestration workflows across **Snowflake** and **BigQuery**. Experienced with **dbt**, **Apache Airflow**, Python, SQL, Docker, Kubernetes, AWS, and GCP in client environments spanning private equity, SaaS, retail, and fintech. Focused on **warehouse performance**, **cost reduction**, **data quality**, API ingestion, and maintainable analytics engineering systems.

EXPERIENCE

Data Engineer Consultant – Lortech Solutions 08/2024–Present

- Built and maintained analytics engineering systems across **7+ client projects** in private equity, SaaS, retail, and fintech, covering **1000+ dbt models**, **100+ orchestration DAGs**, and **multi-terabyte** daily workloads across Snowflake and BigQuery
- Owned end-to-end development of a business-critical investor relations data platform with **350+ dbt models**, **350+ dbt tests**, and Airflow pipelines integrating Outlook, Salesforce, Box, FTP, REST APIs, and SOAP APIs
- Reduced high-cost Snowflake runtimes from **55 minutes to 30 seconds** and BigQuery spend by **35%** through SQL redesign, warehouse tuning, dbt materialization changes, partition usage, and model refactoring
- Designed reusable **dbt model generation and validation** workflows, including macros, metadata-driven templates, model tests, and **CI/CD** checks for large analytics codebases
- Built **observability and SLA validation** workflows for multi-tenant Airflow environments, including automated health checks, source validation, and Slack/email incident reporting
- Standardized orchestration and deployment workflows for **Kubernetes**-based Airflow environments using Docker images, **AWS ECR**, and CI pipelines

Freelance Software Engineer – Self-employed 11/2018–04/2025

- Delivered backend systems, scraping workflows, data extraction pipelines, and automation tools for clients across **EU and US** markets
- Built ingestion and processing systems using **Python**, **PostgreSQL**, Redis, browser automation, and API reverse engineering, including deduplication, retry handling, and schema normalization for unstable external sources

Python Developer – Decision Sciences Company 11/2022–05/2023

Python automation, API integrations, and internal data processing scripts for production data systems.

TECHNICAL PROJECTS

dbt-doctor – GitHub

Open-source dbt productivity and validation tool with **700+ downloads** and **16 GitHub stars**, focused on project maintainability, model quality, and developer workflow.

money sense-data – GitHub

Event-driven cryptocurrency analytics platform for Polymarket market data ingestion using **Kafka**, **ClickHouse**, MinIO object storage, and Parquet-based cold archives.

Dealscan

Multi-source automotive data ingestion pipelines aggregating and deduplicating listings from heterogeneous external platforms using browser automation, API reverse engineering, and PostgreSQL.

SKILLS

Data Engineering: **dbt**, **Apache Airflow**, **Snowflake**, **BigQuery**, ELT/ETL, Data Modeling, Data Quality, Observability, Cost Optimization

Programming: **Python**, **SQL**, Go, TypeScript

Infrastructure: **AWS**, **GCP**, **Docker**, **Kubernetes**, CI/CD, PostgreSQL, ClickHouse, Kafka, MinIO, Parquet

EDUCATION

Polish-Japanese Academy of Information Technology (PJATK)
B.Sc. Computer Science
2024–2028

CERTIFICATIONS

SnowPro Core (Snowflake)
Credential ID: 156908869
dbt Developer (dbt Labs)
Credential ID: 135541190

PUBLICATIONS
