SUMMARY

Data Engineer experienced in building large-scale ETL/ELT pipelines, orchestration workflows, and analytics infrastructure across Snowflake and BigQuery environments for private equity, SaaS, retail and fintech clients.

EXPERIENCE

Data Engineer Consultant – Lortech Solutions 08/2024–Present

- Architected and maintained analytics engineering pipelines across 7+ client projects spanning private equity, SaaS, retail, and fintech domains, covering 1000+ dbt models, 100+ orchestration DAGs, and multi-terabyte daily workloads across Snowflake and BigQuery environments
- Owned end-to-end development of a business-critical investor relations platform consisting of 350+ dbt models, 350+ tests, and orchestrated Airflow pipelines integrating Outlook, Salesforce, Box, FTP, REST and SOAP APIs
- Reduced execution time of high-cost Snowflake workloads from 55 minutes to 30 seconds through warehouse optimization, query redesign, and wide-table refactoring
- Designed frameworks for dbt model generation, validation, reusable macros, and CI/CD workflows
- Designed observability and SLA validation workflows for multi-tenant Airflow environments, including automated health checks and Slack/email incident reporting
- Standardized orchestration and deployment workflows for Kubernetes-based Airflow environments using Docker and ECR CI pipelines

Freelance Software Engineer – Self-employed 11/2018–04/2025

- Designed backend systems, scraping workflows, and data extraction pipelines for clients across EU and US markets
- Built event-driven and real-time systems using Python, PostgreSQL, Redis, browser automation, and API reverse engineering workflows

Python Developer – Decision Sciences Company 11/2022–05/2023

- Developed Python automation workflows and API integrations for production data systems

TECHNICAL PROJECTS

moneysense-data – GitHub

- Designed event-driven cryptocurrency analytics platform for Polymarket market data ingestion using Kafka, ClickHouse, Minio object storage, and Parquet-based cold archives

Dealscan

- Built multi-source automotive data ingestion pipelines aggregating and deduplicating listings from heterogeneous external platforms using browser automation and API reverse engineering

SKILLS

Data Engineering: dbt, Apache Airflow, Snowflake, ELT/ETL, Data Modeling, Data Quality, Observability

Programming: Python, SQL, Go, TypeScript

Infrastructure: AWS, GCP, Docker, Kubernetes, CI/CD, PostgreSQL

EDUCATION

Polish-Japanese Academy of Information Technology (PJATK)

B.Sc. Computer Science
2024–2028

CERTIFICATIONS

SnowPro Core (Snowflake)
Credential ID: 156908869

dbt Developer (dbt Labs)
Credential ID: 135541190
